B. Review Agenda
Motion by Moser, second by Brighouse to approve all course proposals. Votes are recorded following each agenda item.

Moved from Consent Agenda
6. Population Health Sciences 740  Health Impact Assessment of Global Environmental Change
Type: Change number, grad attribute
Grad attribute: Y
Action: Deferred – The proposer will be asked to make revisions to the sample syllabus. The sample syllabus still refers to "PHS 740" (p. 3). In general the committee felt that the graduate portion of the class needs to be described/demonstrated in more detail. It is important to clearly describe the graduate experience throughout the course. The 3 bullet points on p. 3 of the syllabus are great and they would like to see them expanded upon; how will these be assessed? Will the graduate students do any readings that are different from the undergraduate requirements (and might demonstrate a level of engagement with research in the field at a deeper level than an undergraduate)? Finally, the committee was curious about how the quizzes fit in, are they graded? Do they factor in to the final grade?

New Proposals

77. Actuarial Science 655  Health Analytics  
Type: New Course  
Reviewer: Smith  
Action: Deferred  - The committee has several questions about the readings. The syllabus indicates that there is one reading per week of approximately 20 pages. This is not sufficient out of class work for a 3 credit course. There is also mention of "analytics homework" but there is no information about what this is. More information is needed about how participation will be assessed. The syllabus indicated that 35% of the final grade is for "active engagement in class discussion of articles" but there is no information regarding how this will be evaluated. Active engagement by 30 students (anticipated enrollment) would be difficult as a large group, if the class is broken down into smaller groups, how does the instructor monitor multiple discussions? Finally the committee was curious about overlap with other departments on campus, are there similar courses in for example Nursing, SMPH, Bioinformatics and Medical Statistics? Was the course reviewed by any of these units?

78. African Languages & Literature 220  HipHop, Youth Culture, and Politics in Senegal  
Type: New Course
