RE: Formal Closure of the Small Scale Waste Management Program

This memo serves as the official notice of closure of the College of Agricultural and Life Sciences Small Scale Waste Management Program. This decision is supported by the Executive Committee and department chair of Soil Sciences. The Small Scale Waste Management Program is no longer operating as a stand-alone unit. The work and personnel of the program have either moved to their respective departments, been absorbed into other projects, or discontinued as individuals retired or departed. There are no remaining grants or open UDDS numbers associated with the unit.

The program began in 1970 with the mission to provide informative wastewater, soil and land use publications and educational resources to the public.

This item appeared as an automatic consent item on the CALS Academic Planning Council agenda on April 17, 2015.
