#### Brief statement/description of institution (in English)

In achievement and prestige, the University of Wisconsin–Madison has long been recognized as one of America's great universities. A public, land-grant institution, UW–Madison offers a complete spectrum of liberal arts studies, professional programs and student activities. Spanning 935 acres along the southern shore of Lake Mendota, the campus is located in the city of Madison.

#### Mission statement (in English)

UW–Madison is the oldest and largest campus in the University of Wisconsin System, a statewide network of 13 comprehensive universities, 13 freshman-sophomore transfer colleges and an extension service. One of two doctorate-granting universities in the system, UW–Madison's specific mission is to provide "a learning environment in which faculty, staff and students can discover, examine critically, preserve and transmit the knowledge, wisdom and values that will help insure the survival of this and future generations and improve the quality of life for all." The university achieves these ends through innovative programs of research, teaching and public service. Throughout its history, UW–Madison has sought to bring the power of learning into the daily lives of its students through innovations such as residential learning communities and service-learning opportunities. Students also participate freely in research, which has led to life-improving inventions ranging from more fuel-efficient engines to cutting-edge genetic therapies.

## OVERALL

	2006	2007	2008	2009	2010
<b>Number of academic staff</b>			3533.4	3418.64	3473.38

**CAVEAT STATEMENTS****2010**

Many of the subject-level data provided differ from last year's data. This is due to the CIP code crosswalk that you have provided. Last year we made our own determinations, which differ from yours on some fields, and some of subjects appeared in more than one grouping on the Times Higher Ed list. It is important to note that subject-level data are estimates, and we continue to refine ways to obtain more accurate estimates.
